SENIOR MANUFACTURING / QUALITY ENGINEER II

Aerospace & Defense | AS9100 | Quality Engineering | Manufacturing Excellence | Supplier Quality | Continuous Improvement | Process Validation | Regulatory Compliance

PROFESSIONAL SUMMARY

Manufacturing and Quality Engineer with extensive experience supporting aerospace, defense, medical device, and regulated GMP manufacturing environments. Strong background in quality systems, manufacturing processes, validation, supplier quality, and continuous improvement across full product lifecycle from development through production.

Recognized for solving complex manufacturing and quality issues, driving root cause investigations, implementing corrective actions, and improving process performance, yield, and compliance. Experienced working across engineering, manufacturing, quality, and supply chain teams in fast-paced, highly regulated environments.

Technical expertise includes AS9100/AS9102 compliance, FAI/FAIR execution, RCCA, CAPA, FMEA, SPC, PPAP, APQP, process validation, auditing, and supplier quality management. Strong ability to interpret engineering drawings, GD&T, and translate requirements into robust manufacturing and inspection processes.

CORE COMPETENCIES

QUALITY & COMPLIANCE

AS9100 | AS9102 FAI | CAPA | RCCA | FMEA | SPC | PPAP | APQP
Internal & External Audits | Supplier Quality | Risk Management
MRB & Non-Conformance Management | Process Validation
MSA | Configuration Management | ITAR | DFARS | FAR | NADCAP

MANUFACTURING & PROCESS IMPROVEMENT

Manufacturing Process Development | Production Support
Lean Manufacturing | Six Sigma | Continuous Improvement
Process Optimization | Capacity Planning | NPI
Engineering Change Control (ECO/ECN) | Cost Reduction
Cross-Functional Coordination | Multi-Project Management (150+)

QUALITY ENGINEERING

GD&T Interpretation | CMM Inspection | Metrology Systems
Inspection Planning | Control Plans | Validation Activities
Engineering Documentation | BOM Management | Design Reviews

PROJECT & STAKEHOLDER SUPPORT

Customer & Supplier Interface | Audit Support
KPI Tracking & Reporting | Root Cause Analysis
Corrective Action Management | Stakeholder Collaboration
Training & Technical Support

SOFTWARE & SYSTEMS

AutoCAD | SolidWorks | Creo
Microsoft Excel | Word | PowerPoint
TrackWise | MasterControl | EDMS
Change Control Systems | Project Tracking Tools

PROFESSIONAL EXPERIENCE

Senior Manufacturing / Quality Engineer II

Randolph and Baldwin, Inc. | Ayer, MA | Jul 2024 – Present

- Own product realization lifecycle from requirements through design, manufacturing planning, validation, FAI, and production launch.
 - Translate engineering drawings, GD&T, and customer requirements into manufacturing and inspection strategies.
 - Lead NPI programs integrating engineering, manufacturing, quality, and supply chain functions.
 - Develop BOMs, routings, work instructions, control plans, and manufacturing documentation.
 - Lead FAI/FAIR, APQP, PFMEA, PPAP, and process validation activities aligned with AS9100/AS9102.
 - Drive DFM and DfAM improvements to enhance manufacturability, quality, and cost.
 - Support cost estimation, capacity planning, and production scheduling for new and existing programs.
 - Lead root cause investigations and corrective actions to improve yield and reduce defects.
 - Support additive manufacturing, machining, fabrication, assembly, and inspection processes.
 - Maintain configuration control, engineering changes, and technical data packages.
 - Mentor engineers and production staff on quality systems and manufacturing best practices.
-

Validation Engineer II

Azzur Group | Devens, MA | Aug 2023 – Jul 2024

- Led validation activities for GMP manufacturing systems, equipment, and capital projects.

- Developed and executed IQ, OQ, PQ protocols and validation documentation.
 - Collaborated with engineering, QA, facilities, and MS&T teams on project execution.
 - Supported ultrafiltration, chromatography, mixing, and bioprocess systems.
 - Managed commissioning and qualification activities through full project lifecycle.
 - Led risk assessments, deviation investigations, and CAPA resolution.
 - Maintained validation master plans, change controls, and compliance documentation.
-

Validation Engineer II

Cirtec Medical Inc. | Lowell, MA | Apr 2023 – Jun 2023

- Executed IQ/OQ/PQ validation protocols for medical device manufacturing equipment.
 - Supported PPQ planning, execution, and reporting activities.
 - Performed FAT/SAT and equipment commissioning activities.
 - Conducted risk assessments for validation scope and system criticality.
 - Prepared validation reports, deviations, and CAPA documentation.
 - Collaborated with QA, engineering, and manufacturing teams to ensure compliance.
-

Process & Validation Engineer II

Organogenesis Inc. | Canton, MA | Nov 2021 – Feb 2023

- Led IQ/OQ/PQ validation activities for GMP manufacturing equipment and systems.
 - Developed PFMEA, control plans, and process risk mitigation strategies.
 - Supported NPI and product transfer activities.
 - Managed engineering change controls and process improvements.
 - Conducted root cause analysis and CAPA investigations.
 - Supported statistical analysis for process performance and capacity planning.
 - Maintained GMP documentation and supported audit readiness.
-

Process Engineer

Sun Pharma | Billerica, MA | Jul 2021 – Nov 2021

- Led deviation investigations and product impact assessments.
 - Developed and maintained GMP documentation including batch records and SOPs.
 - Conducted root cause analysis and implemented CAPA actions.
 - Supported process optimization and troubleshooting activities.
 - Performed engineering calculations for process equipment and systems.
 - Assisted with cold chain packaging validation and thermal testing.
-

GMP / Process Engineering Technician

Amgen | Woburn, MA | Jun 2020 – Jul 2021

- Executed IQ/OQ/PQ protocols for GMP manufacturing systems and utilities.
 - Supported biologics manufacturing operations (UF/DF, chromatography, filtration).
 - Performed troubleshooting and maintenance of process and utility systems.
 - Supported vendor qualification and validation activities.
-

EARLIER TECHNICAL EXPERIENCE

Shire Pharmaceuticals – Senior Process Engineering Technician

Supported GMP biologics manufacturing, troubleshooting, and equipment reliability.

Teleflex – Process Engineering Technician

Supported utility systems, equipment installation, and commissioning.

Guardian Glass (UAE) – Mechanical Technician

Performed industrial maintenance, commissioning, and process support.

Hilton Hotels – Mechanical Maintenance Technician

Performed facility maintenance and mechanical systems support.

Beth Israel Lahey Health – Patient Registrar

Provided patient intake and administrative support.

Staples – Sales Associate

Customer service, retail operations, and sales support.

EDUCATION

Bachelor of Engineering (B.E.), Mechanical Engineering

Visvesvaraya Technological University (VTU), Karnataka, India | May 2014

Credential Evaluation Completed

Associate Diploma in Mechanical Engineering

Gujarat Technological University (GTU), Gujarat, India | May 2009

Credential Evaluation Completed
